

MEMO 4-C 2/86

To : Distribution
From : K. Tsuchihashi
Subject : Comments on EXFOR Tapes

29th March, 1977

This memorandum proposes some corrections found during the conversion of EXFOR tapes 1054-1057, and 3021-3022 to the internal CCDN format.

The errors indicated by the other Centres are omitted.

TRANS 1054

10182.002 Data for 83-NP-237,NF looks to be a factor of 10 too high. Retransmission required.
10204.001 The main reference added on TRANS 1042 disappears on this transmission. We require a comment for such a change.
10267.001 The main reference is missing a volume number. No retransmission required.

TRANS 1056

10422.002-006 XDATA table should retain two data lines. No retransmission required.
10533.002.00058 Incident energy should increase monotonously.
10602.002.00092 The same comment as above.
