

MEMO 4-C 2/119¹²⁰NDB/9882/cel
10th October, 1983.

To: Distribution
From: A.P. Thompson
Subject: Laboratory and Country Code for Japan

We propose changing all Japanese laboratory codes in EXFOR and CINDA dictionary 3 to the following:

2JPNJPN	Japan
2JPN...	all others, where '...' is the existing 3-letter laboratory code.

All new Japanese entries should contain these codes; the old codes 2JAPJAP, 2JAP... will be marked as obsolete so that already existing entries may remain for an unspecified transition period.

NEADB will correct and transmit to NNDC all affected CINDA entries. NEADB will correct and retransmit to NNDC, NDS and CJD all affected EXFOR entries in its service area.
