

Memo 4C-3/73

To: Distribution

19 January 1973

From: P. Winiwarter, H.D. Lemmel

Subject: Improvements in dictionaries (Memo 4C-3/67)

As tests have shown 12-character expansions of lab and journal codes are not meaningful to the user in many cases. Thus additional expansions or dictionaries would be necessary.

We feel that any requester for CINDA-retrievals (or reader of the NNCSC newsletters) is in possession or can get hold of a CINDA volume. We propose to use in any output the usual CINDA lab and journal codes and to refer the user to the respective dictionaries.
