

Memo 4C-3/84

To: Distribution

16 July 1973

From: P.M. Attree *PA*
H.D. Lemmel

Subject: Reply to Memo 4C-1/38 2-dimensional tables

The proposal concerning 2-dimensional tables drawn up in Vienna immediately preceding the last 4-Centre Meeting, and which could have been implemented without too much delay was not accepted at the 4-Centre Meeting.

We regret that until we see, in writing the proposal which was accepted in Moscow, we are unable to enter into any further discussions on the subject. Our manpower situation is desperate, and therefore any proposals which require considerable programming to produce readable listings could not be implemented within a year from now.
