SUBJECT: New codes suggested by NDCC during 4C-Meeting

Reference: Entry 20550 in TRANS 2020
Entry 20571 in TRANS 2070

We are not sure whether the proposed quantity codes NG, SPC, MS resp. NG, SPC, GND as used in entry 20550. are correct. Probably, the data given are decay gammas which have no relation to the capture of the incident neutrons. If this is correct, these data should not be coded within the neutron Exfor file. Unless hearing to the contrary we shall enter the proposed quantity codes in Dict. 14 but mark them as obsolete.

We could not verify the proposed conference code 75GAUSSIG, which is included in entry 20571, although Gaussig seems to be in area 3. We should appreciate receiving further information on this conference, preferably a copy of any relevant document.
