

Memo 4C-3/185

To: Distribution
From: H.D. Lemmel *HDL*
Subject: Unresolved Resonance Energies
Reference: Subentry 20381.003
Note: Manual update involved

10 November 1976

Subentry 20381.003 with the quantity NF,RES,RBT has three independent-variable columns headed EN, EN-MIN, EN-MAX. (Their sequence is inverted; perhaps this could be corrected in the NEUDADA/EXFOR conversion program.) The column heading should be EN-RES instead of EN. The unresolved resonance energies could better be expressed by repetition of the column-heading EN-RES:

EN-RES	EN-RES	EN-RES
1.2E-5		
1.37E-5	1.40-5	1.45-5
1.8E-5		
3.1E-5	3.2E-5	

This requires addition of a sentence under item 1.) on page VIII.21 of the Manual:

"Similarly, the column-heading EN-RES may be repeated in the case of unresolved resonance-energies." If no objection is received in due time, this should be included in the Manual, and we request retransmission of this subentry.
