Memo 4C-3/188

To: Distribution
From: *AWA* P.M. Attree + H.D. Lemmel *HDL*

25 November 1976

Subject: Cinda publication schedule for 1977/78
(simultaneously update of the NDS Cinda Manual)

Please find attached the proposed detailed schedules for the publication of Cinda in the years 1977/78. These are based on the outline of the CINDA 76/77 publication schedule included in memo 4C-3/156 of 15 Jan. 1976.

Also included are preliminary price estimates, and we should like to ask the centers to arrange for approval by the pertinent authorities and for appropriate budgeting.

We suggest this schedule to be approved by the other Centers. We shall assume approval if no objection is received in due time.

(Holders of the NDS Cinda Manual are requested to update their Manuals with the two pages of this memo which are marked on the bottom "NDS CINDA 76/11".)

This memo also pertains to Action 31 of the 1976 4C-Meeting.

Publication schedule for CINDA in the year 1977Detailed schedule for CINDA 76/77 Supplement 2 (approx. 400 pages)

- approx. 14 Jan 1977 Complete labsort on tape received by NDS from NDCC.
 18 Feb 1977 First deadline for NDS entries to reach NDCC.
 10 March 1977. Final deadline for last NDS entries to reach NDCC.
 31 March 1977 Suppl. 2 tape received by NDS from NDCC.
 All tables needed from NDCC received by NDS.
 soon after Complete labsort on tape received by NDS from NDCC.
 (Easter is on 10./11. April)
 19 April 1977 Processing at NDS completed and tapes shipped out.
 2 May 1977 Phototypesetting processing completed and film shipped to NDS.
 23 May 1977 Printing and binding completed. Ready for distribution.
 1 June 1977 Bulk shipments to leave Vienna.
 (since it is a supplement this time instead of a large issue, the processing time can be a bit shorter than previously.)

Detailed schedule for CINDA 76/77 Supplement 3 (approx. 600 pages)

- approx. 5 Aug 1977 Complete labsort on tape received by NDS.
 9 Sept 1977 First deadline for NDS entries to reach NDCC.
 29 Sept 1977 Final deadline for last entries to reach NDCC.
 19 Oct 1977 CINDA 76/77 Suppl. 3 tape received by NDS from NDCC.
 All tables needed from NDCC received by NDS.
 soon after Complete labsort on tape received by NDS from NDCC
 28 Oct 1977 Processing at NDS completed and tapes shipped out.
 10 Nov 1977 Phototypesetting processing completed and film shipped to NDS.
 1 Dec 1977 Printing and binding completed. Ready for distribution.

Publication Schedule 1978 onwards, proposalCINDA 78 "archival" issue with ref-date \leq 1976vol. 1 Z \leq 52 (approx. 1000 pages)vol. 2 Z \geq 53 (approx. 1000 pages)CINDA 78, vol. 3, new literature with ref-date \geq 1977 (approx. 300 pages)

Note: a cut-off date for the "archival" issue at end of 1976 seems to be the best, in particular also because the Cinda file for this cut-off date could just be included in two volumes. The estimated number of 2000 pages assumes an increased number of no-book flags, and assumes that the ref-date of the main-line of a block is taken as criterion, such that actually a number of pre-1976 references will be included in vol. 3, if their main line is dated 1977.

Schedule: First NDCC deadline 17 Feb 1978
Final NDCC deadline 10 March 1978
Publication date 1 June 1978

CINDA 78, Supplement (approx. 200 pages)

First NDCC deadline 8 Sept 1978
Final NDCC deadline 29 Sept 1978
Publication date 1 Dec 1978

Note: this supplement and the following issues should also include "important" additions and corrections to literature older than 1976. We shall have to discuss what to regard as "important" and how to flag such entries.

CINDA 79, all literature with ref-date \geq 1977 (approx. 500 pages)

Publication date 1 June 1979

CINDA 79, Supplement (approx. 200 pages)

Publication date 1 Dec 1979

CINDA 80, all literature with ref-date \geq 1977 (approx. 700 pages)

Publication date 1 June 1980
etc.

The choice of the cut-off date is an optimization problem. Assuming that the spring issues, CINDA 79 and onwards, are to be cumulative issues for all literature since the cut-off date, these will grow in size and price if the cut-off date is chosen earlier. E.g., taking the cut-off date a year earlier, may make all following spring issues thicker by, perhaps, about 200 pages. — On the other hand, if the cut-off is chosen at a too late date, the following issues will again become thicker due to revisions (blocking, etc) to the latest references of the "archival" issue. It will therefore be essential that the Cinda clean-up is in good shape up to the cut-off date, including Exfor index lines.

Comments and counter proposals are welcome!
=====

Price estimates

Cinda 76/77 with three supplements with an estimated total of
2066 + 250 + 400 + 550 = 3266 pages costs 86.- US\$, that is
2.6 cents per page. Assuming 15% price increase per year, the
page price will be approximately

3.00 cents in 1978
3.5 cents in 1979
4.00 cents in 1980

This brings the following annual costs:

1978: "archival" issue, 2000 pages	60.- \$
vol. 3 + Suppl., 500 pages	15.- \$
1979: Cinda 79 + Suppl., 700 pages	25.- \$
1980: Cinda 80 + Suppl., 900 pages	36.- \$

These figures are very rough estimates only. The bulk prices will be, as usual,
50% of the quoted prices.
