Subject: TRANS 3024

We wish to apologize that our TRANS tape 3024 contains the formalism of the keyword ASSUMED, although this had been agreed for use from 1 October onwards only. The reason is, that the tape contains many resonance parameters, needed at NNDC with high priority, and these data could hardly be coded in a convenient manner without the keyword ASSUMED. We hope that this will not create too great inconveniences.

Please note that also column heading keywords ASSUM1, ASSUM2, ASSUM2-MAX, ASSUM3 have been used, as well as the new column heading ISOMER.
