From: Nuclear Data Section *Lemmel (for all staff involved)*

Subject: 70 000 series

- 1.) Happy New Year !
- 2.) Please delete the entire 70 000 series.

The 70 000 Exfor series, containing the area-3 entries converted by NNDC from the SCISRS library, can be deleted. The entries have been checked thoroughly. Some of them were recompiled from scratch and have already been transmitted in the regular 30 000 series (compare earlier 4C-Memos). A few of them are still in process and will be transmitted soon. A large fraction containing 69 entries with 349 sub-entries has been machine-converted from the 70 000 series into the 30 000 series after thorough checking, correcting, and adding a HISTORY entry. The STATUS code (SCSRS) was however kept, indicating that for these entries the information on method, standard, error-analysis, etc, may not be as complete as it should be. These 69 entries are being transmitted in TRANS 3027.
