Memo 4C-3/224

1978-07-07

To: Distribution

From: H. D. Lemmel *Lammel*

Subject: Actinides data

In view of the Agency's coordinated research program on the comparison of evaluations of actinide neutron data, I would like to request all centers to compile such data and transmit them in Exfor with priority and minimum delay.

First priority have Th-232 (India and Romania) and Am and Cm isotopes (several countries). In the next few years the program includes all elements from 90-Th to 96-Cm, but excluding the well-known nuclides U-235, 238 and Pu-239.

We realize that this program coincides with similar interests in the other centers, and we would appreciate your cooperation with the fast transmission of these data.

Clearance: *for* J.J. Schmidt
