Subject: INDL/A

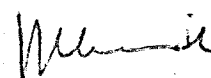

The present version of the IAEA Nuclear Data Library for Actinides is being sent out to the neutron data centers, together with a summary documentation IAEA/NDS-12. The library contains evaluations performed by the participants of the IAEA coordinated research programme on the intercomparison of actinide neutron data evaluations. Related reports are listed in the document IAEA/NDS-12. If these reports are not available to you, please request a copy from NDS. These reports also include intercomparison with other evaluations.

Please note that some of the evaluations included may be preliminary and may undergo further revisions.

For further information on this coordinated research project see the reports INDC(NDS)-104 and INDC(NDS)-119, the latter one being in preparation.

Any comments on the evaluations will be highly appreciated.
