Subject: TRANS-4038, 4039

Today we are sending out magnetic tapes to the 3 neutron data centres containing TRANS-4038 and TRANS-4039 as corrected at NDS.

The detailed error report, with request for retransmission of those erroneous entries we could not correct (in particular errors in the numerical data) is, as usual, being sent to the originating center only.

Entry 40422 transmitted in TRANS-4039 contains purely nuclear decay data. Therefore we do not include it in our Area 4 neutron-Exfor, but changed its Accession Number to Q0422 and keep it separately. The same applies to entry 40427 transmitted already in TRANS-4037. We include these 2 entries as file 3 of the tape.
