Subject: CINDA book schedule and price estimate for CINDA-91

As announced at the 1990 Technical NRDC Meeting, the production of the CINDA books has to be done by a new technique, i.e. by a laser printer instead of the previous photo-typesetting. This requires substantial changes in the book production programs, which turned out to be more difficult than envisaged. Unfortunately, our new staff member Ramon Arcilla, who is responsible for these program changes, was not available before February 1991. Therefore the deadlines given in the attached book production schedule are later than in previous years and must still be regarded as tentative.

It would be essential to have all the newly available evaluated data libraries indexed in the new book. May we therefore request NEA-DB to prepare index entries for JEF-1, JENDL-3 and JENDL-3-FP before the end of April 1991. We will prepare index entries for IRDF-90 and for the BROND evaluations that are presently available here, as well as entries for ENDF/B-6 which will be routed through NNDC.

The sales price of CINDA-91, assuming about 380 pages, will be around 500.- AS. That is 250.- AS for the bulk order price. For estimating the number of copies to be printed we need to receive bulk orders (if any) by end of April 1991. Where no bulk order is received, we offer the same very limited free distribution as for CINDA-A, i.e. to CINDA coworkers and major producers of EXFOR and ENDF-formatted data.
