

MEMO CP - A/1

To: look distribution list
From: G.M. Zhuravleva *Thuravleva* Data:
Subject: 1. O TRANS A0000
2. Addition to the dictionary 25.

1. Tape TRANS A0000 can't be used for surtching in libraries of nounceutron EXFOR, as it keeps in section the designations of units not yet established by the net. It refers to A0003, A0004.

Transmission aims of this tape:

- 1.1. Make sure, network of Centres is techucally capable to read tape, prepared in CAJAD.
- 1.2. To get remarks from network of Centres on format errors.
2. It is suggested for measurement units of product output from thick target in reactions with charged partickles to introduce in the dictionary the following 25 designation:

2.1. NUC/PAR (product nucleus
~~bombarding particle~~)

This designation is often used in theoretical works.
