

Memo CP-D/340

3 July 2002

From: O. Schwerer

Subject: Error of total energy in center of mass system (CP-E/007)

The following headings were proposed for dictionary 24 in memo CP-E/007:

EN-CM-ERR	C.M. energy error
+EN-CM-ERR	+ Unsymmetric C.M. energy error
-EN-CM-ERR	- Unsymmetric C.M. energy error

The current practice is to use error headings EN-ERR not only with EN but also with EN-CM, and there are a number of entries in the file using EN-CM and EN-ERR.

My preference is to keep this practice. However, if this should be considered a disturbing inconsistency (same error heading for 2 different main headings) we could decide to introduce the new headings. Your feedback is requested.
