**Memo CP-D/392**

**Date:** 10 May 2004

**To:** Distribution

**From:** O. Schwerer

**Subject:** **Transmission data: change in dictionaries and LEXFOR**

**Reference:** **CP-D/368**

In memo CP-D/368 the REACTION coding

, SIG , , TRN      Transmission (with units NO-DIM)  
(to be used with reaction SF3 = TOT)

was proposed, and this coding was approved at the 2003 NRDC meeting.

However there is the code

, SIF

for Self-indication function. For better consistency it is therefore proposed to change the coding for transmission to

, TRN      (in REACTION SF6)

Since , SIG , , TRN was not yet used except for PRELIM 4132, this change does not require any changes in already finally transmitted entries.

The following changes in LEXFOR are required:

- Correct entry on Self-indication (not in agreement with dictionary 36)
- Explain coding of Transmission data and relation to Self-indication.
