Memo CP-D/548 (Rev.)

Date: 4 November 2009
To: Distribution
From: S. Dunaeva, N. Otsuka
Subject: **REFERENCE of ISINN conference proceedings**
Reference: Memo CP-D/467, CP-D/309, 4C-4/98

1. Proceedings of “Interaction of Neutrons with Nuclei” (ISINN conference) have been published as a report JINR-E3-yy-nn (yy = 2 or 4 digits year, nn = an integer). Our conclusion in the NRDC 2000 meeting is

“The Dubna conferences will be coded using the appropriate JINR report codes (rather than conference codes such as 95DUBNA), with the title of the conference given in free text.” (Conclusion 8)

according to our rule written in the LEXFOR entry “Reference”:

Conferences. If conference proceedings are issued within a report series, so they can be identified with a report number, then the report number must be used, not the conference code. The date given is the date of the report.

2. As explained in CP-D/467, the sequential numbers like ISINN-1, ISINN-2,... have been printed since the 1993 conference on the covers of the proceedings. The report number JINR-E3-yy-nn has been moved to the last page since 2001.

ISINN-	JINR-E3-		ISINN-	JINR-E3-		ISINN-	JINR-E3-
1	-		6	98-202		11	-2004-9
2	94-419		7	99-212		12	-2004-169
3	95-307		8	2000-192		13	-2006-7
4	96-336		9	2001-192		14	-2007-23
5	97-213		10	2003-10		15	-2008-26

3. Some authors cited these proceedings by ISINN- rather than JINR-E3-. For librarians ISINN- numbers printed on the covers are more easily recognized than JINR-E3- numbers on the last pages.

Therefore we would propose the following coding for the conference proceedings:

((S , ISINN-n , page , year) = (S , JINR-E3-n-n , page , year))

, and also propose to made obsolete two relevant conference codes.

Dictionary 7 (Conference codes)

2001DUBNA (obsolete)
2002DUBNA (obsolete)

Appendix: List of ISINN conference proceedings articles in EXFOR

Note (4 November, 2009):

Because NDS found that the area 2 and 4 compilers have used the month of the conference in the list, the month is proposed to be deleted. It should be the month of publications if it is given. One might think to use the date of “Подписано в печать” (signed in print) printed near the report number as the date of publication. But there is an example where we cannot regard the date of “Подписано в печать” as the date of publication.

Example:

ISINN-16 was held 11-14 *June, 2008*. But “Подписано в печать” is *13 April, 2008* and its report number is JINR-E3-2009-33.

NDS asks compilers to use only 4 digits year taken from the JINR-E3 report numbers for the date field of the ISINN conference proceedings.
