Memo CP-D/719

Date: 10 November 2011
To: Distribution
From: N. Otsuka
Subject: **Dictionary 236 (Quantities) - PR,KEM**
Reference: Memo CP-D/599

According to the general agreement on fission quantity coding summarized in Memo CP-D/599, the temperature of the prompt fission neutron spectrum approximated by a Maxwellian spectrum should be coded as

(---(-, F) **0-NN-1**, PR, KEM) rather than (---(-, F), PR, KEM, **N**)

. This change has been already made in 20175.002 in PRELIM.2227. I agree with this change, and propose the following change in the dictionary:

Dictionary 236 (Quantities)

PR, KEM Temperature of Maxwellian distribution of prompt neutrons
PR, KEM, N (*Obsolete*)
