Subject: Duplication held by one centre

I found eight duplication pairs where two entry numbers are maintained for one experiment by one centre. Four centres (CAJaD, NNDC, JCPRG, CDFE) are asked to delete one entry for each pair.

The EXFOR Feedback List is suggesting deletion of shaded entries. But the originating centres can make the opposite decision with notification.

Note that area B and R were originally maintained by discontinued centres (KaChaPaG and RIKEN), and this could be a reason of duplication.
