Memo CP-E/087

Date: February 15, 2006
To: Distribution
From: OTSUKA Naohiko
Subject: Corrections to Dictionary 236 (Quantities)

Expansions of quantity codes MLT, N and PAR, MLT, N are followed by short remarks:

“For *non-neutron induced reactions* only. For *neutron-induced reactions* use ',NU'.

“For *non-neutron induced reactions* only. For *neutron-induced reactions* use 'PAR,NU'.

However our conclusion 17 of 2005 NRDC meeting is

"Neutron multiplicity from fission will be coded with NU for all projectiles"

Therefore now *, MLT, N and *, NU should be applied to *non-fission neutron multiplicity* and *fission neutron multiplicity*, respectively.
