**MEMO CP-N/44**

**DATE:** 22 March 2006  
**TO:** See distribution list below  
**FROM:** H. Henriksson  
**SUBJECT:** Inclusion in dictionary 236 and correction of dic 6

A new code is suggested for dictionary 236:

TER/BIN, FY/RAT, T - Ternary/binary fission triton yield ratio

Also proposed is a correction to Dictionary 6 from:

IAEA-TECDOC I.A.E.A. Technical Documents	3ZZZIAE30000	6	682
previously coded as			
IAEA-	30000	6	683

To:

IAEA-TECDOC- I.A.E.A. Technical Documents	3ZZZIAE30000	6	682
previously coded as			
IAEA-	30000	6	683

Maybe this is just a format problem of the dictionary file, as the code (IAEA-TECDOC-) is 12 characters instead of the 11 spaces available in the TRANS version of the dictionary files. The problem might be in the checking codes for EXFOR (e.g. CHEX).

Best regards,  
Hans Henriksson
