SUBJECT: Single particle dictionary proposal

As discussed at the NRDC Technical meeting, I am submitting the following proposal for the combining of the EXFOR particle dictionaries into one dictionary. (This proposal may look suspiciously like the current Archive Dictionaries).

Merge EXFOR dictionaries 14, 28, 29, and 33 into a complete particle dictionary: Dictionary 33. All codes that exist in any of the dictionaries will be included in the combined dictionary. Add allowed subfield flags (similar to Dictionary 27). The format of the dictionary would be as follows.

Dictionary 33: PARTICLES

Column	12-14	Allowed use flags
12	D:	BIB keyword other than REACTION
13	1:	REACTION SF2
14	2:	REACTION SF3
15	7:	REACTION SF7
