Memo CP-C/311

DATE: December 9, 2002
TO: Distribution
FROM: V. McLane
SUBJECT: Anti-protons

In keeping with the current rules for coding production cross sections, data for the production of anti-protons should have a code in field 4 for the anti-proton.

For this purpose, we should introduce a code into Dictionary 27 for the anti-proton. I suggest 1-AP-1, which is analogous to the code for the neutron 0-NN-1.

This is a temporary measure to include data currently in process; see data set E1706 in preliminary TRANS E021.
