Subject: Comments on TRANS R012

TRANS R012 (version with minor corrections by NDS) was made available through the NDS open area in July. This TRANS contains only entry R0052 with corrections requested earlier. For your information, the changes added by NDS are listed below.

- HISTORY entries must be cumulated, i.e. in case of a retransmission like the present one, a new line under HISTORY must be ADDED to the previous ones rather than to replace them. (Normally to be done by originating center)
- DATA-ERR: since ERR-ANALYS now has ERR-T, the headings in the DATA sections had also to be changed to ERR-T.
- The N1, N2 counters in the system identifier records (DATA, ENDSUBENT etc.) were frequently missing or incorrect.
