Memo CP-D/392

Date: 10 May 2004

To: Distribution

From: O. Schwerer

Subject: **Transmission data: change in dictionaries and LEXFOR**

Reference: **CP-D/368**

In memo CP-D/368 the REACTION coding

`,SIG, ,TRN` Transmission (with units NO-DIM)
(to be used with reaction SF3 = TOT)

was proposed, and this coding was approved at the 2003 NRDC meeting.

However there is the code

`,SIF`

for Self-indication function. For better consistency it is therefore proposed to change the coding for transmission to

`,TRN` (in REACTION SF6)

Since `,SIG, ,TRN` was not yet used except for PRELIM 4132, this change does not require any changes in already finally transmitted entries.

The following changes in LEXFOR are required:

- Correct entry on Self-indication (not in agreement with dictionary 36)
- Explain coding of Transmission data and relation to Self-indication.
